Drone Challenge UAV

- Teams design, build, program, and test an unmanned aerial vehicle that meets the year's challenge requirements.
- Teams also document how the drone was built, including photos, wiring information, and details about the software or programming used.
- Rounds include obstacle courses and semifinalists also complete an interview.

Structural Design

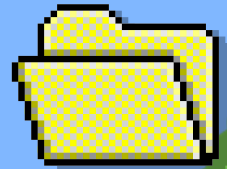

- Teams use structural engineering ideas to design and build a bridge.
- A documentation portfolio records the design and engineering process.
- At competition, the structure is destructively tested to see how much load it can handle and how efficient the design is.
